

Children's Wisconsin PGY-1 Pharmacy Residency

About Children's Wisconsin

Children's Wisconsin is a private, independent, not-for-profit health care system dedicated solely to the health and well-being of children. Our flagship hospital in Milwaukee offers 298 beds, a level 1 surgery center, 72 bed pediatric intensive care unit (PICU), level 1 trauma center, and a level 4 neonatal intensive care unit (NICU).

Purpose

The PGY-1 pharmacy residency program at Children's Wisconsin is a 12-month, ASHP-accredited program. Our residency provides valuable training in the various aspects of pharmacotherapy and pediatrics through a customizable program comprised of 4, 5, or 6-week rotations. The mission of the post-graduate year one residency program at Children's Wisconsin is to train competent and independent practitioners of pediatric pharmacy in an academic, free-standing, pediatric health-system setting. The first-year residency program builds general pediatric pharmacy foundations in managing care of the pediatric patient, medication use systems specific to pediatric pharmaceutical care, and supports optimal medication therapy outcomes for patients with a broad range of pediatric disease states and achieves this through research, education, and multi-disciplinary teamwork.

Longitudinal Experiences

- Staffing every third weekend
- Research Project
- Trauma/Code Response
- P&T Committee
- Pharmacy Clinical Practice Council
- Teaching Certificate Program at the Medical College of Wisconsin School of Pharmacy
- Primary IPPE Preceptor

Elective Longitudinal Rotations

- Pediatric investigational drug services

Residency Benefits

- Stipend: \$52,000
- Health, vision, dental and life insurance
- Pediatric Advanced Life Support (PALS) training
- 25 days paid personal leave

Required Clinical Rotations

- Central Pharmacy/Nutrition
- General Medicine
- General Medicine II
- Infectious Disease/Pharmacokinetics
- Neonatal Intensive Care Unit
- Pediatric Intensive Care Unit (PICU & CICU)
- Hematology, Oncology and Bone Marrow Transplant
- Administration/Leadership

Elective Clinical Rotations

- Antimicrobial Stewardship
- Solid Organ Transplant
- Emergency Department and Trauma Center
- Toxicology
- Informatics
- Complex Care Services

Children's Wisconsin PGY-2 Pediatric Pharmacy Residency

Purpose

The PGY-2 pediatric pharmacy residency program at Children's Wisconsin is a 12-month, ASHP-accredited program. Our residency provides valuable training in the various aspects of pharmacotherapy and pediatrics through a customizable program comprised of four-to-six-week rotations. The mission of the post-graduate year two residency program at Children's Wisconsin is to train competent and independent practitioners of advanced pediatric pharmacy in an academic, free-standing, pediatric health-system setting. The second-year residency program builds upon general pediatric knowledge in managing care of the medically complex pediatric patient, medication use systems specific to pediatric pharmaceutical care in critical care and acute care areas and supports optimal medication therapy outcomes for complex patients with a broad range of pediatric disease states and achieves this through research, education, multi-disciplinary teamwork, and leadership. The PGY-2 program allows the resident to complete a general pediatrics year or subspecialize within pediatric pharmacy practice in the following areas: cardiac intensive care, medical/surgical/trauma intensive care, and neonatal intensive care.

Required Clinical Rotations

- Central Pharmacy/Nutrition
- General Medicine
- Neonatal Intensive Care Unit
- Pediatric Intensive Care Unit (PICU & CICU)
- Hematology, Oncology and Bone Marrow Transplant
- Emergency Department & Trauma Center
